

OIF DU EXPOSURE SEMIANNUAL PROGRESS REPORT

Exposure Assessment, Testing, and Results Information

Exposure Level	No. Personnel Identified	Referral Source				Fragment-Type Injury (Q 37) ¹	Urine Bioassay Results				Results to Patient	Patient Referral to VA
		Self	Service/Command	VA	Other		Initial Positive ²	Confirmed Positive ³	Negative ⁴	Pending/Undetermined/Unknown		
I						†						
II												
III												
Total (This Report)						†						
Cumulative Total ⁵												

Level I Fragment Information

Fragment Type	Number of Patients with Fragments	Urine Bioassay Results			
		Initial Positive ²	Confirmed Positive ³	Negative ⁴	Pending/ Undetermined/ Unknown
DU					
Other; specify ⁶ _____					
Other; specify ⁶ _____					
Other; specify ⁶ _____					
Total (This Report)	†				
Cumulative Total ⁵					

Notes:

¹ Positive response to Question 37a or 37b on the DU Exposure Questionnaire – long form (VA or DoD Test Form/SF 600 over print)

² Urinalysis \geq 50ng Uranium per gram creatinine

³ Urinalysis \geq 50ng Uranium per gram creatinine, initial and follow up specimens

⁴ Urinalysis $<$ 50ng Uranium per gram creatinine

⁵ If fragment types are known, identify them in the space provided

⁶ Cumulative total will reflect total of this report as well as those on any previous progress reports

† All three cells with this symbol should reflect the same value
